

# seripettor® · seripettor® pro

## Bottle-top Dispenser

The dispenser for  
biological laboratories

Dispense quickly and  
with minimal effort

Simple and efficient  
maintenance

**BRAND. For lab. For life.**

# seripettor® · seripettor® pro

- Replaceable dosing unit and wearing parts.
- Easy cleaning and maintenance
- Easy to operate.
- Simple and effortless aspirating and dispensing.
- Volume range from 0.2 to 25 ml

## The low-cost alternative...

**seripettor®** and **seripettor® pro** are innovative bottle-top dispensers from BRAND with a special design. A lifting spring ensures effortless filling. When the piston seal is worn out, the entire dispensing unit can be exchanged by the user rapidly and problem-free.

**seripettor®** and **seripettor® pro** open up an enormous range of applications in routine lab work, with dispensing of buffer solutions, culture media, vitamin solutions; acid, alkaline or salt solutions, and many polar solvents. Even special cases can be managed; for example, the **seripettor®** can handle agar culture media up to a max. of 60 °C. A guide for selecting the right equipment can be found on the last page.

### Eliminate expensive repairs! Dissassembles without tools.

The innovative design of **seripettor® / seripettor® pro** makes cleaning and maintenance easy. All parts can be replaced quickly without tools.

## A closer look...

### Volume settings

Scalloped track allow for quick and exact setting of desired volume. The selected volume can be easily read.

### Dispensing

For dispensing, press down gently on the piston. Filling is effortless thanks to the lifting spring.

### Replaceable dosing cartridge

The "heart" of the **seripettor® / seripettor® pro** is the dosing unit with a piston seal that wipes the cylinder during operation. When required, it can be easily replaced at little cost.

### Fits most bottles

Valve block (45 mm) and included adapters (32 and 40 mm) match the threads of the most common reagent bottles.

## Handling

### Filtration

Sterile filtration of media directly from the bottle with the **seripettor® pro** and the vent cannula with Luer-Lock attachment (filter sold separately).

### Serial dispensing

The optional flexible discharge tube with the safety grip makes it easier to dispense in long series (it connects to the valve block with an adapter).

### Accessories for dispensing sterile liquids

1. Mount the valve block with filling tube onto the bottle and cover the valve block with cap. Fix the autoclavable sterile membrane filter (0.2 µm) laterally and autoclave at 121 °C.
2. On a Clean-bench (sterile hood), remove the cap from the valve block, screw in a new sterile dispensing cartridge and mount the pump assembly. You're ready to dispense!

# Materials of Construction

	seripettor®	seripettor® pro
Pump assembly	PC	PPO/PEI (for UV protection)
Lifting spring	spring steel	Hastalloy (stainless)
Dispensing cartridge	PE/PP	PE/PP
Valve block	PP	PP
Valve	PP/EPDM	ETFE/borosilicate glass/Al <sub>2</sub> O <sub>3</sub> /Pt-Ir
Discharge tube	FEP	PTFE/ETFE/FEP/PFA/borosilicate glass/Al <sub>2</sub> O <sub>3</sub> /Pt-Ir
Filling tube	PP	Telescoping filling tube, FEP/PTFE
Cap for discharge tube	Stopper cap, PP	Screw cap, PP

When the device is handled properly, the dispensed liquid comes into contact with the following chemical-resistant materials only: Borosilicate glass, Al<sub>2</sub>O<sub>3</sub>, PE, PP, EDMP, FEP, ETFE, PTFE, platinum-iridium.

## Operating Limits

	seripettor®	seripettor® pro
Vapor pressure	up to 500 mbar	up to 500 mbar
Density	up to 2.2 g/cm <sup>3</sup>	up to 2.2 g/cm <sup>3</sup>
Temperature	15 to 40 °C, agar cultures up to 60 °C	15 to 40 °C
Viscosity	2 ml instrument: 300 mm <sup>2</sup> /s	2 ml instrument: 300 mm <sup>2</sup> /s
	10 ml instrument: 150 mm <sup>2</sup> /s	10 ml instrument: 150 mm <sup>2</sup> /s
	25 ml instrument: 75 mm <sup>2</sup> /s	25 ml instrument: 75 mm <sup>2</sup> /s

## Ordering Data

### Items supplied:

seripettor®/seripettor® pro, discharge tube, filling tube, spare dispensing cartridge and adapter, PP (GL 45/32 and GL 45/S40).

\* All dispensers calibrated to deliver (TD, Ex). Error limits according to the nominal capacity (= maximum volume) indicated on the instrument, obtained with instrument and distilled water at equilibrium with ambient temperature at 20 °C, and with smooth, steady operation. A = Accuracy, CV = Coefficient of variation

## Accessories

### Dispensing cartridges

Non-sterile and sterile piston (PE), cylinder (PP).

Description	Pack of	Cat. No.
2 ml, non-sterile	3	7045 00
10 ml, non-sterile	3	7045 02
25 ml, non-sterile	3	7045 04
2 ml, sterile (individually wrapped)	7	7045 07
10 ml, sterile (individually wrapped)	7	7045 06
25 ml, sterile (individually wrapped)	5	7045 08

### Flexible discharge tube

PTFE, coiled, length 800 mm, with handle. Not suitable for HF and peroxides. Pack of 1.

Nominal volume	Cat. No.
2 + 10 ml	7045 22
25 ml	7045 23

### Discharge tube with Luer-Lock attachment for micro filter

FEP/PP. Pack of 1.

Cat. No. 7079 26\*

\* not suitable for peroxide

**Note:** seripettor® and seripettor® pro are not suitable for HF.

The above recommendations reflect testing completed prior to publication. Always follow instructions in the operating manual of the instrument as well as the reagent manufacturer's specifications. In addition to these chemicals, a variety of organic and inorganic saline solutions (e.g., biological buffers), biological detergents and media for cell culture can be dispensed. Should you require information on chemicals not listed, please feel free to contact BRAND. Status as of: 0619/9
