Description

The WESTMED® rescue blanket in the silver-gold version (210 x 160 cm) is a high-vacuum aluminium-vaporized foil that is a versatile rescue tool. Thanks to its reflective properties, it can reflect up to 85 % of body heat, minimizing radiation losses and preventing hypothermia. At the same time, it is also suitable as heat protection to prevent overheating. This rescue blanket complies with the regulations for business first aid kits in accordance with DIN 13157 and DIN 13169 as well as vehicle first aid kits in accordance with DIN 13164. Its use is highly recommended not only in these contexts, but also in any other first aid kit. The dimensions of 210 x 160 cm ensure generous coverage, while the silver-gold color combination is not only eye-catching, but also allows efficient reflection of heat. The rescue blanket is packed in a space-saving PE bag, ready to perform life-saving functions in various emergency situations.

Technical information	
Reference number	F009
Color	silver-gold
Material	Aluminum-coated foil
Dimensions	210 ±2 cm x 160 ±2 cm
Intended use	The rescue blanket is designed to wrap the limbs of wounded people to keep them warm or insulate them.
