

Load Capacity STAVANGER® Winch Loop

The STAVANGER® winch loop is an anchor point for height rescue and can also be used as a makeshift handle. The 4-cm-wide polyester webbing is double-stitched to the backpack's body all around and over all four sides. The loop is secured by cross stitching, rivets and an additional webbing section and has been tested for tensile properties.

Specifications:

- + Tear strength of webbing of 1,210.48 daN (~ 1.23 t)
- + Tensile properties of textile fabrics - Part 1: Determination of maximum tensile strength and maximum tensile elongation with the strip tensile test DIN EN ISO 13934-1 (2013-08) based on DIN EN 1492-1
- + Approved by the German Accreditation Body D-PL-17323-01-00
- + Winch loop loadable up to 530.4 daN (~ 541 kg)
- + The use of strap loops is recommended as a sling.
