I find that I'm using it more often because it seamlessly fits in as an extension of the physical exam. I'm very impressed. It's quite a bit smaller and lighter, so it fits very nicely into my hand and is very simple and easy to use. It's very sleek. The image quality's been excellent. It's very crisp and clean and definitely in comparison to the previous cart-based ultrasound we were using, it's been night and day."
